

**HOT TOPICS IN RENAL TRANSPLANTATION:  
Regenerative medicine/Polyoma nephropathy**  
FAD sincrona 26 Marzo 2021

**Razionale**

This meeting traditionally brings together investigators and clinicians with foremost experience in kidney transplantation, to discuss topics related to kidney transplant care. The interdisciplinarity of workers, the periodical nature of these meetings and the friendly relationships among the participants make them a unique opportunity to discuss freely and in an informal context. Failure of a kidney transplant is still a major problem after kidney transplantation, in spite of recent immunosuppressive protocols and focus of clinical management addressing at prolonging long-term graft survival. This focus edition of the Hot Topics in Renal Transplantation addresses the issue of the regenerative medicine and the Polyoma nephropathy.
