**ORGAN TRANSPLANTATION FROM DCD AND
THE MANAGEMENT OF MULTIPLE ORGANS
FAILURE INCLUDING REGENERATIVE MEDICINE**

Solid organ transplantations represent a well-known strategy to manage different organ failures, making feasible for many patients to survive, changing their lives for the best. The University of Bologna and the IRCCS S.Orsola-Malpighi Hospital offer the opportunity to receive this treatment since more than 50 years: while the clinical and scientific staffs changed over the decades, our main objective stayed the same: always to improve the quality of cure & care.

During the 10 years, we had the opportunity to explore new approaches and pathways intended to expand the donor pool, and to improve recipients' outcome. The introduction and evolution of transplantation from DCD donors changed our perspective, offering an important chance of treatment for many patients suffering from organ failure. The present meeting is aimed to share updates and experiences, and to discuss the clinical challenges still associated with the utilization of these type of grafts. We are going to offer a format including, for most of the sessions, ten-minute-long talks, followed by a 5 minute-long discussion, with the purpose to stimulate debate and exchange of ideas between the speakers, among major national and international experts in this rapidly evolving field of research and clinical practice, but also to favour the interaction with the attendees. The meeting will bring together physicians, perfusionists, nurses, and the whole team of allied healthcare professionals who daily contribute to the success of the major and most common solid organ transplantations, and, in the intentions, will allow sharing updates and experiences covering liver, kidney, heart, and lung transplant. A second section of the meeting will explore the future directions in the field, and the possible clinical application of regenerative medicine in the setting of organ failure and organ transplantation. We hope everyone will enjoy the meeting and give their contribution, to ensure a high scientific profile.

LIVER AND KIDNEY SESSION

WHAT DID WE LEARN AND WHAT HAVE WE STILL TO LEARN ABOUT DCD LIVER TRANSPLANTATION?

Moderators: Prof. Luciano de Carlis and Prof. Matteo Ravaioli

09.00 **Which data during NRP should contraindicate the use of DCD liver for transplantation?**
Dr. Damiano Patrono
comment 5 min Prof. Salvatore Gruttadauria

09.20 **Ex-vivo strategies for DCD liver grafts: shorter CIT, HOPE, normothermic perfusion or a combination of these? Available evidence and how to decide**
Dr. Riccardo De Carlis
comment 5 min Prof. De Simone Paolo

09.40 **Anesthesiologic management of donor and recipient in the DCD setting**
Prof Gianni Biancofiore
comment 5 min Dr. Andrea De Gasperi

10.00 **Italian experience and evolution of the DCD**
Dr. Silvia Trapani
comment 5 min Prof. Renato Romagnoli

10.20 **Discussion**

Moderator: Prof. Matteo Cescon

10.40 **Evolution of liver DCD in Switzerland and in Europe**
Prof. Philip Dutkowski

Coffee break e poster session 30 min

**WHAT DID WE LEARN AND WHAT HAVE WE STILL TO LEARN ABOUT
